Eureka! is a national, five-year program created by Girls Inc. to encourage girls to explore career paths in STEM fields (science, technology, engineering, and mathematics).

It consists of four weeks of intensive programming during the summer and additional sessions throughout the school year (years 1-5). Eureka! is open to girls entering 8th and 9th grades.

Designed to meet the intellectual, social, physical, and emotional needs of adolescent girls, programming combines STEM subjects with sports and personal & professional development activities. It also provides adult mentors and job shadow experiences in science and non-traditional fields.
